Company Overview
About Lonza

Lonza is the preferred global partner to the pharmaceutical, biotech and nutrition markets.

We work to enable a healthier world by supporting our customers to deliver new and innovative medicines that help treat a wide range of diseases. We achieve this by combining technological insight with world-class manufacturing, scientific expertise and process excellence.

Our unparalleled breadth of offerings enables our customers to commercialize their discoveries and innovations in the healthcare sector.

Our Five Strategic Priorities

SERVICE
Manufacturing and operational excellence to deliver quality, value and "right first time"

SCOPE
An unparalleled breadth of offerings across services and modalities

SUSTAINABILITY
Delivering long-term value, economically, environmentally and socially

SOLUTIONS
Scientific, regulatory and manufacturing expertise to solve our customers’ challenges

SPEED
Ability to accelerate the path to commercialization
Our Company Values

**INTEGRITY**
Having the accountability, honesty and courage to speak up and do the right thing

**INCLUSION**
Being supportive, respectful and responsible towards others

**INNOVATION**
Being engaged, curious and enquiring to find the best possible solution

**INITIATIVE**
Being self-driven, motivated and committed to focus and deliver
Sustainability and Safety Are Critical to Our Success

**Sustainability at Lonza**

- **Our People**
  Help our employees develop and grow

- **Value for Society**
  Innovating science-based solutions

- **Our Environment**
  Reduce energy, water and material use

**Safety at Lonza**

- **Compliance and Integrity**
  Ensuring the highest standards of product quality

- **Vision ZERO**
  Incidents, injuries or emissions
Sustainability: 2020 Milestones and Future Targets
2030 goals allow long-term strategy and smart investment

**Milestone 2020**
Baseline 2018 (Per CHF 1 Million Sales)

- **ZERO**
  - Corrective Actions and Accidents (Defined by target)
- **- 4%**
  - Energy
- **- 6%**
  - CO₂ More Renewable Energy
- **- 4%**
  - Waste

**2030 Targets**
Baseline 2018, Total Company (Per CHF 1 Million Sales)

- **ZERO**
  - Zero Lost Time Injuries (Aspiration)
- **- 24%**
  - Energy
- **- 36%**
  - CO₂ e.g. through more renewable electricity
- **- 24%**
  - Waste
Half-Year 2021

</tr>
</tbody>
</table>

¹CORE EBITDA margin change vs. H1 2020 at actual exchange rates

Growth projects ramp-up in Biologics drives growth but dilutes margins

Strong sales momentum and operating leverage lead to 26.9% CORE EBITDA growth in Small Molecules

Robust demand for hard capsules drives above-market growth in CHI

Profitability in Cell & Gene ramps up rapidly, as CGT is set to approach break-even in Q4
### Operational Free Cash Flow

Cash generation is robust despite higher investments

EBITDA is impacted by CHF 284m Gamsenried (CH) environmental remediation provision (total provision amounts to CHF 290m)

NWC improvement is partially offset by inventory stock build-up to mitigate COVID-related supply challenges

Increased CAPEX will further accelerate in H2

Other cash flow is positively impacted by increased customer pre-payments

CAPEX Overview
80% of investments support future growth

CAPEX Breakdown H1 2021
in m CHF

All Divisions invest behind growth, with mammalian capital intensity being higher

Investments deliver attractive ROIC and are partly secured by contracted demand and a clearly identified customer pipeline

1 Cell & Gene division includes Cell & Gene Technologies and Bioscience businesses
Leverage Profile
Strong balance sheet provides optionality

Leverage remains stable despite growth project investments, reflecting strong CORE EBITDA growth and cash generation.

LSI proceeds will be deployed in organic growth projects, selected bolt-on M&A and debt repayment.

Our balance sheet provides ample headroom for investments within our objective of maintaining strong and stable investment grade rating.

Net Debt/ CORE EBITDA¹

</tbody>
</table>

1. Restated to reflect the classification of Specialty Ingredients as discontinued operations

**ROIC increase reflects Net Operating Profit growing 3x faster than Invested Capital**

Our tax rate remains below our long-term rate of 16-18% due to favorable country mix and Gamsenried provision

**ROIC development is expected to reverse in H2 as a result of higher investments**
Drivers for H1 and H2 Performance
Our guidance is revised upwards for sales growth and maintained for margin

<table>
<thead>

<td></td>
</tr>
</tbody>
</table>

\(^1\)Third-party sales to LSI will have a positive impact of 1.5-2.0ppt on CER sales growth and a negative impact of (0.5)pppt on CORE EBITDA margin for FY 2021

\(^2\)2023 CORE EBITDA margin Mid-Term Guidance of -33-35%
Business Overview
The Opportunities for Lonza

Lonza strengths

Flexible and global asset network across modalities
Trusted partner of choice for pharma and biotech customers
Investing in science-driven improvements for manufacturing medicines
Industry leading talent and expertise

External Opportunities

More molecules, increasing complexity and expedited pathways
New classes of medicines/modalities (e.g. cell and gene technology, mRNA, Live biotherapeutic products)
Increasing levels of innovation from small and start-up VC-funded companies. Geographic diversification of innovation and finance hubs
Key growth areas across sports nutrition, healthy aging and digestive wellness
The Opportunities for Lonza

**Societal Trends**
- Growing world population
- Aging population in Western countries
- Growing economies and middle classes in BRIC\(^1\) and Next 11\(^2\) countries

**Patient Health Trends**
- Prevalence of chronic disease
- Rare and orphan diseases
- Pressure on healthcare budgets
- Accelerated approval pathways
- Patient access stratification by geography and wealth

**Pharma and Biotech Industry Trends**
- Uncertain demand
- More complex molecules
- High investment risk
- Accelerated timelines
- Increased therapeutic competition
- Continued drug pricing pressure
- Cell and gene at inflection point
- Biologics growth in China
- Solubility and bioavailability issues

---
\(^1\) BRIC - Brazil, Russia, China, and India
\(^2\) Next 11 countries: Bangladesh, Egypt, Indonesia, Iran, Mexico, Nigeria, Pakistan, the Philippines, Turkey, South Korea, and Vietnam

</thead>
<tbody>
<tr>
<td>‘Go to’ CDMO, supporting more than 1,065(^1) pre-clinical, clinical and commercial molecules</td>
<td>Global reach and expertise across modalities, underpinned by R&amp;D investment, capability building and innovative partnerships (e.g. partnering with Moderna to produce the drug substance for Moderna COVID-19 Vaccine)</td>
<td>Unique breadth of technologies to deliver for customers across the value chain - from clinical development of innovative therapies through to large-scale commercial manufacture</td>
</tr>
</tbody>
</table>

### Integrated approach

Clinical and commercial production under the same roof, simplifying comparability requirements and eliminating technology transfers between sites. Drug substance and drug product development and manufacturing

### Manufacturing excellence

Advanced manufacturing and quality-control systems, superior regulatory expertise, in-depth market knowledge, extensive technical-customer support, strong R&D capabilities and world-class facilities in more than 30 countries

### People and expertise

Industry-leading expertise, attracting the best global talent and investing in employee training and development

\(^1\)As of December 2020
Market-Leading CDMO Position

>820 pre-clinical and clinical small¹ and large² molecules

>245 commercial small¹ and large² molecules

Small Molecules¹

>400 pre-clinical and clinical molecules

>200 commercial molecules

Biologics²

>420 pre-clinical and clinical molecules

>45 commercial molecules

¹As of December 2020. Including active pharmaceutical ingredients (API), highly potent API (HPAPI), dosage form and delivery systems and particle engineering
²As of December 2020. Including mammalian, microbial, cell & gene therapy products and bioconjugates (applied protein services and drug product services are included for pre-clinical and clinical molecules only)
R&D Investments and Innovative Partnerships
Investing to stay one step ahead of industry challenges

**Inventive capsule and small molecule projects**
- Launch of an innovative capsule system used to control cargo release timing and location, improving delivery and bioavailability.
- Commercializing a new proprietary technology in small molecule-based therapies that helps overcome bioavailability challenges.

**Scalable personalized medicine**
- Cocoon® Platform was qualified towards clinical and commercial readiness and treated the first cancer patient at Sheba Medical Center (IL) with an autologous CAR-T therapy.
- Developing a multiplex solution – Cocoon® Tree™ which will enable the scale-out of manufacturing.

**Towards next-generation modalities**
- 10-year collaboration with Moderna on mRNA platform.
- BacThera – first end-to-end CDMO for live biotherapeutic products.
- Induced Pluripotent Stem Cell (iPSC) manufacturing expertise.
- Exosome-based therapeutics manufacturing capabilities.

**Digitalization**
- Use of machine learning algorithms to optimize processes and yields, increase transparency and better integrate Lonza into our customers’ supply chain ecosystem.
- Successfully deploying virtual reality (VR) trainings across our operations.
New and Expanded Customer Projects in H1 2021
Sustained high demand for Lonza offerings

- Ibex® Solutions meet strong market interest. Significant proportion of new large-scale mammalian assets are already contracted
- Guangzhou Biologics is fully validated, operational and has several customers
- Focus on new modalities: mRNA, complex-to-express molecules, personalized Medicine Solutions and first customer signing for exosomes
- Expanding customer collaborations, on COVID-related projects and more targeted therapies
Ambitious Investment Plan to Drive Further Growth in H1 2021
Expanding end-to-end solutions across modalities

- Strong demand and new contracts across all technologies and scales, with actively managed supply impacts arising from COVID-19
- Ibex® Solutions concept remains attractive to customers:
  - High capacity utilisation and batch success rate for existing assets
  - Significant proportion of new capacity is contracted in Visp (new collaboration signed with a biopharmaceutical partner)
- Guangzhou (CN), operations have started and several customers are signed
- Compared to H1 2021, continued sales growth in H2 2021. H2 margin may be somewhat softer than H1, reflecting project mix, one-time effects and the increasing impact of growth projects

Numbers in left column are a comparison vs. Half-Year 2020
²Sales growth, expressed as a percentage (%), are at constant exchange rate (CER)
## Biologics Overview

### Our Offerings

- Cell line construction
- Process development and optimization
- Manufacture of drug substance and drug product for mAbs and other recombinant proteins
- Mammalian cell culture and microbial fermentation including small to large scale
- Development and manufacturing of bioconjugates
- mRNA drug substance production

### Our Key Priorities

- Increase end-to-end offering for small and large Pharma and Biotech
- Expand development and manufacturing capacity
- Leverage Ibex® Solutions
- Build presence in commercial Fill and Finish
- Geographic expansion

---

1As of December 2020. Including mammalian, microbial, cell & gene therapy products and bioconjugates (applied protein services and drug product services are included for pre-clinical and clinical molecules only)
Cell & Gene
Financial and operational performance in H1 2021

Sales (CHF) 274m
+24.7%²

CORE EBITDA (CHF) 44m
n/a

CORE EBITDA Margin 16.1%
n/a

Cell & Gene Technologies
- Solid sales growth and positive margin evolution:
  - Further growing pipeline and new customers signed
  - Performance improvement supported by focus on operational excellence
- Cocoon® Platform adoption is developing well with investment in collaboration agreements
- First successful BLA for Houston (US)
- Compared to H1 2021, continued anticipated sales growth in H2 2021, supported by positive margin development
- Ambition to approach break-even by Q4 2021

Bioscience
- Strong momentum, driven by discovery and testing
- Solid demand for equipment and software
- Continue to leverage our product portfolio to support cell and gene therapies
- Softer anticipated H2 2021 margin, linked to business mix, accompanied by continued H2 2021 sales growth

Numbers in left column are a comparison vs. Half-Year 2020
²Sales growth, expressed as a percentage (%), are at constant exchange rate (CER)

Bioscience products filled with regulatory agencies

Primary cell types

Scientific publications used a Lonza Bioscience product in 2020

Our Offerings

Providing life science researchers with the tools they need to develop and test therapeutics, from basic research to product release

Products and services ranging from cell culture and discovery technologies for research, to quality control tests and software for biomanufacturing

Our Key Priorities

Implement a digital transformation to enhance customer experience

Accelerate growth in the cell and gene therapy segment

Market share leadership in endotoxin market

MODA-ES© Platform adoption in biologics, cell and gene therapy and CDMO markets
### Capsules & Health Ingredients

- Business continuity maintained during COVID-19, allowing division to reach a milestone of five trillion capsules produced since the business commenced operations.
- Strong performance across business offerings, driven by the capsules portfolio.
- Slightly softer sales growth expected in H2 2021, compared to H1 2021 in anticipation of end-consumer demand gradually returning to pre-pandemic level.
- Slightly softer H2 2021 margin compared to H1 2021, driven by one-time business costs.

### Our Offerings

- Innovative capsule delivery solutions for pharmaceutical and nutraceutical customers
- Health ingredients backed by clinical research to support claims
- Cutting-edge capsule dosage forms and services
- Global manufacturing and processing capabilities

### Our Key Priorities

- Continuing to strengthen our global manufacturing network and innovation capability
- Becoming more customer centric organization
- Accelerate profitable growth
- Focus on high-growth, high-margin Joint Health and Nutrition markets
Looking to the Future
Upward revision to 2021 Outlook: mid-teens CER sales growth driven by sustained strong momentum across businesses

CORE EBITDA margin improvement in line with Mid-Term Guidance trajectory, as guided at the beginning of the year

Outlook assumes similar level of COVID-related impacts, no significant adverse impact on demand and no further disruptions in supply chain or business operations
Priorities for H2 2021

- Drive to accelerate growth and capacity increase to meet customer demand and secure long-term growth

- Continue to manage the challenges and opportunities arising from the COVID-19 pandemic

- Focus on continuous improvement

Information about investor relations events is constantly updated on the website:

www.lonza.com/about-lonza/investor-relations
We believe that disclosing CORE results of the Group’s performance enhances the financial markets’ understanding because the CORE results enable better year-on-year comparisons.

Therefore, the CORE results exclude exceptional expenses and income related to e.g. restructuring, environmental-remediation, acquisitions and divestitures, impairment and reversal of impairment of assets, which can differ significantly from year to year.

For this same reason, Lonza uses these CORE results in addition to IFRS as important factors in internally assessing the Group’s performance.

In Lonza’s 2021 Alternative Performance Measures Report, the reconciliation of IFRS to CORE results provides further details on the adjustments.
Lonza Group Ltd has its headquarters in Basel, Switzerland, and is listed on the SIX Swiss Exchange. It has a secondary listing on the Singapore Exchange Securities Trading Limited (“SGX-ST”). Lonza Group Ltd is not subject to the SGX-ST’s continuing listing requirements but remains subject to Rules 217 and 751 of the SGX-ST Listing Manual.

Forward-looking statements contained herein are qualified in their entirety as there are certain factors that could cause results to differ materially from those anticipated. Any statements contained herein that are not statements of historical fact (including statements containing the words “outlook,” “guidance,” “believes,” “plans,” “anticipates,” “expects,” “estimates” and similar expressions) should be considered to be forward-looking statements. Investors are cautioned that all forward-looking statements involve risks and uncertainty.

There are a number of important factors that could cause actual results or events to differ materially from those indicated by such forward-looking statements, including the timing and strength of new product offerings; pricing strategies of competitors; the company’s ability to continue to receive adequate products from its vendors on acceptable terms, or at all, and to continue to obtain sufficient financing to meet its liquidity needs; difficulty to maintain relationships with employees, customers and other business partners; and changes in the political, social and regulatory framework in which the company operates, or in economic or technological trends or conditions, including currency fluctuations, inflation and consumer confidence, on a global, regional or national basis.

In particular, the assumptions underlying the Outlook 2021 herein may not prove to be correct. The statements in the section on Outlook 2021 constitute forward-looking statements and are not guarantees of future financial performance.

Lonza’s actual results of operations could deviate materially from those set forth in the section on Outlook 2021 as a result of the factors described above or other factors. Investors should not place undue reliance on the statements in the section on Outlook 2021. Except as otherwise required by law, Lonza disclaims any intention or obligation to update any forward-looking statements as a result of developments occurring after this presentation was published.
